

The ASB meeting is going hybrid!

29th Nov - 1st Dec 2021, School of Physics, University of Melbourne

We are looking forward to welcoming you in person and on zoom to hear about the latest biophysics research at this year's ASB meeting that will be hybrid in delivery. The meeting will be hosted by the School of Physics, University of Melbourne, and delivered virtually online for those that cannot attend in person.

The organising committee is looking forward to putting together an exciting program that will include a plenary session from Professor Warwick Bowen, University of Queensland, who will talk about his recently developed quantum microscope that can see the impossible, invited international and national lectures, several talks selected from abstract submissions and a joint session with the Biophysical Society of Japan.

More details to follow regarding program and registration.

ASB 2021 Program Committee

Elizabeth Hinde, University of Melbourne
Lissanne Spenkelink, University of Wollongong
